Theo Bodart

Functional Consultant | Discovery, Prototyping & AI Solutions

Paris, France • contact@tblabs.dev • tblabs.dev • linkedin.com/in/théo-bodart-50368317b

PROFILE

Engineer by training with over 3 years of experience in functional software scoping and coordination with technical teams. Skilled at understanding business needs, translating technical concepts for non-technical audiences, and configuring tools, I act as the bridge between clients' operational goals and developers. Hands-on with AI: rapid prototyping with AI agents, and built an LLM application (RAG) measured against a test set. Looking for Solutions Engineering, Pre-Sales or AI Deployment roles.

PROFESSIONAL EXPERIENCE

Solutec Consulting firm — Functional Consultant — Nov 2022 – Mar 2026 | Paris

Mission Banque de France — Functional Scoping & Deployment Consultant — Mar 2024 – Dec 2025

- Demoed new features to business departments and directly supported end users in adopting them.
- Gathered, analyzed, and formalized business requirements for the evolution of a 3-tool application portfolio.
- Wrote functional specifications, user journeys, and business rules for development teams.
- Validated functional compliance of deliverables (UAT, integration) and facilitated agile ceremonies.

Mission BNP Paribas — Functional Consultant & Process Automation — Nov 2022 – Mar 2024

- Led automation projects and business rule reliability improvements in close collaboration with IT.
- Processed and modeled complex data volumes (advanced Excel).
- Configured, tested, and implemented new business rules to improve data processing reliability.
- Wrote Python scripts to simplify, optimize, and improve the reliability of control rule maintenance.

Intern — Tools & Deployment Consultant — Tackops Start-up — Feb 2022 – Aug 2022 | Paris

- Independently scoped operational needs with nursing home clients to design a custom tool (Excel/VBA).
- Integrated user feedback, made ongoing adjustments, and supported teams in tool adoption.

Intern — Operations & Improvement Associate — Hiflow Scale-up — Aug 2020 – Feb 2021 | Paris

- Coordinated daily logistics flows between B2B professional clients and partner carriers.
- Analyzed operational processes and optimized internal procedures to improve service reliability.

PROJECTS & TECH PROTOTYPING

App Prototyping & AI Exploration — tblabs.dev — 2026

- **Trustdesk** — AI assistant (RAG) that fills in security / RFP questionnaires from a vendor's documentation, citing a source for every answer and flagging what isn't documented. Evaluated on 50 test questions (12 with no documented answer) using an LLM-as-judge checked against human grading; Mistral and Gemini compared, 0 invented answers on the trap questions in the version in use.
- **MetArenaStats** — tier lists for a League of Legends game mode, built on hundreds of thousands of matches continuously pulled via the Riot Games API.
- **Drip** and **SeekSpot** — two iOS apps: precision rain timing (widgets, Live Activities, private beta) and a real-time multiplayer photo geolocation game.
- All designed and built by directing AI agents (Claude Code); data modeling (Supabase), JSON, Make automations.

SKILLS & TOOLS

Client & Business	Discovery, Product Demos, Technical Translation, Client Onboarding, Agile / Scrum, User Stories
Tech & Automation	Make, Claude Code / AI Agents, RAG & LLM Evaluation, REST APIs, SQL, Mistral / Gemini API, Supabase, Python (scripting), Jira, Confluence, Advanced Excel (Solver), Power BI, Notion
Languages	English (C1 — BULATS: 83/100), French (native)

EDUCATION

Engineering Degree, Industrial & Logistics Engineering — Université de Technologie de Troyes (UTT) — 2017 – 2022
